SUMMARY

Software Engineer at SAP Labs (BTP Core) and Master of Engineering specializing in Cloud Computing with expertise in Cloud Architecture, DevOps, and cloud automation. Experienced in building scalable cloud solutions through hands-on projects.

EXPERIENCE

SAP Labs – BTP Core

Aug 2025 – Present

Software Engineer Intern – SAP Document Management Service (SDM)

SAP Enterprise Content Management (ECM) is SAP's legacy content management product running on the SAP BTP Neo environment. SAP Document Management Service (SDM) is its next-generation, cloud-native successor on SAP BTP Cloud Foundry, providing secure storage, governance, and lifecycle management of unstructured business content (documents, attachments, media) for SAP and non-SAP applications.

- Worked extensively on SAP BTP using Cloud Foundry runtime to deploy, manage, and monitor microservices, gaining hands-on experience with cloud-native application lifecycle management on the platform.
- Developed a multi-threaded Python toolkit for forward and reverse metadata migration from MongoDB to PostgreSQL on the ECM (Neo) environment, improving data portability and migration efficiency.
- Designed and developed the getContentStream API for SDM-SRV, enabling efficient streaming retrieval of document content from the underlying storage layer for downstream consumers on SAP BTP.
- Gained hands-on exposure to microservices architecture on SAP BTP, working with Java/Spring Boot-based services for scalable, cloud-native service delivery.
- Worked with SAP HANA DB and PostgreSQL for metadata persistence, and integrated multi-cloud object storage across AWS S3, Azure Blob Storage, Google Cloud Storage, and Alibaba Cloud OSS for storing document content.
- Used Git, Jenkins, and GitHub Actions for source control and CI/CD pipelines, with SCA and SAST verification stages enforcing code quality and security compliance across SAP BTP services.
- Delivered microservices to SAP BTP Cloud Foundry landscapes using a Blue-Green deployment strategy, ensuring zero-downtime releases and safe rollback.

PROJECTS

AIOps Agentic Self-Healing Kubernetes Platform

03/2026

AI-driven AIOps platform for automated incident detection, Root Cause Analysis (RCA), and self-healing in Kubernetes. <https://github.com/bharathac5775/aiops-agentic-platform>

- Built a Multi-Agent System (LangGraph) for automated monitoring, analysis, remediation, and reporting with Prometheus, Alertmanager, and Loki for real-time observability.
- Implemented RAG-based RCA using ChromaDB and LLMs via Ollama; policy-driven Auto-Remediation using the Kubernetes Python Client.
- Automated deployments via Jenkins CI/CD and integrated Discord-based alert notifications.

Designing Secure and High-Performance 3-tier Web Application on AWS

08/2024 – 12/2024

Designed and deployed a scalable 3-tier web application on AWS with high availability and fault tolerance.

- Hosted a static website on Amazon S3 and built a dynamic application on Amazon EC2.
- Designed a secure VPC with public and private subnets to isolate web and database layers.
- Migrated the database to managed Amazon RDS and implemented serverless reporting using AWS Lambda.
- Implemented scalability using Auto Scaling Groups, Elastic Load Balancer, Route 53, monitored with CloudWatch, and automated infrastructure using CloudFormation.

Progressive Delivery Techniques

02/2025 – 04/2025

Implemented progressive delivery using Kubernetes, Istio, Flagger, and ArgoCD for automated canary deployments with zero downtime.

- Designed Canary Deployment strategies using Argo Rollouts and Flagger with Jenkins CI pipelines and GitOps workflows via Argo CD.
- Improved observability using Kiali, Prometheus, Grafana, EFK and Jaeger.

SKILLS

AI and DevOps Tools

Git | GitHub | Docker | Kubernetes | Jenkins | CircleCI | GitLab | ArgoCD | Flagger | Istio | Ansible | Terraform | Prometheus | EFK | Loki | Jaeger | SAP-Cloud Foundry | SAP-Kyma | AIOps | Agentic AI | RAG | LLM | LangGraph

AWS Cloud Management Service

Compute: EC2 | ECS | EKS | Lambda | Beanstalk | Storage: S3 | EBS | EFS | Database: RDS | DynamoDB | Networking: VPC | Route53 | Load Balancer | CloudFront | AWS cloud Security | Systems Manager | Step Functions | Glue | IaC: CloudFormation | Monitoring: CloudWatch | CloudTrail

Languages, OS & Networking

C | Data Structures | Java (Basics) | Python (Basics) | SQL Linux | Windows | Computer Networks

EDUCATION

Manipal School of Information Sciences (MSIS)

M.E in Cloud Computing, Manipal Academy of Higher Education (MAHE), Manipal

GPA: 9.52 / 10.0

07/2024 – Present

NMAM Institute of Technology (NITTE)

B.E in Computer and Communication, Visvesvaraya Technological University, Belagavi

GPA: 8.8 / 10.0

12/2020 – 03/2024

CERTIFICATION

AWS Academy Cloud Foundations

AWS Academy Cloud Architecting

AWS Academy Cloud Security and Builder

AWS Academy Cloud Operations

DevOps and AI on AWS (Coursera)

KodeKloud Certificates

Web Development Bootcamp (Udemy)
